

Motors & Wheels Procurement Report

This report covers sourcing and pricing details for motors and wheels only

LOCALLY AVAILABLE

ATV Tire & Rim Set (15x6.00-6, Sairon)

PKR 9,000 (with rim)

ATV Tire & Rim Set (AT 145/70-6, Junkai)

PKR 9,000 (with rim)

Solid Rubber Wheel (11¾ x 3½ x 8)

PKR 11,000

DC Gear Motor (Unbranded)

PKR 8,000

DC Gear Motor (Sealed/Packed)

PKR 8,000

DC Gear Motor

PKR 7,000

DC Motor Pair (SUN-3500, 24V 150W)

USED

PKR 6,000

TO BE IMPORTED

MY1016Z 24V 250W Two-Stage Reduction Gearmotor

Permanent magnet brushed motor, 2-stage gear reduction, 75 RPM output, high torque — originally designed for electric wheelchair drive systems, which makes it a strong candidate for a compact, high-torque drivetrain in our chassis.

PKR 15,000

≈ PKR 35,000 landed cost (incl. shipping)

Its wheelchair-grade gearbox is built for continuous load-bearing torque at low speed, so it should hold up well under our chassis weight without needing an external reduction stage.

MY1016Z 24V 250W DC Motor (75/120 RPM, 44mm Shaft)

Permanent magnet brushed DC motor, available in 75 RPM or 120 RPM variants, 44mm shaft length, 17mm shaft diameter.

PKR 7,000

≈ PKR 20,000 landed cost (incl. shipping)

A lighter, lower-cost alternative to the first option — the longer 44mm/17mm shaft gives more flexibility for direct coupling to wheels or pulleys without needing a custom adapter, and the 120 RPM variant offers a useful speed option if torque can be traded off.
